

Excavator Hydraulic Pressure Test Kit

This excavator hydraulic test kit is designed for diagnosing hydraulic systems. It includes digital pressure gauges and various test couplings for wide compatibility.

Product Overview

Comprehensive Hydraulic Diagnostic Solution

The XZTK-70D(C) hydraulic pressure test kit is a professional-grade diagnostic suite designed for the rigorous maintenance requirements of heavy construction equipment. It provides technicians with the tools necessary to measure and troubleshoot hydraulic system pressures across a vast array of global excavator platforms. Housed in a durable case for field portability, this kit ensures accurate system diagnostics to prevent pump, valve, and cylinder failures.

Performance Metrics

Key Performance Specifications

10000 PSI
Max Pressure

700 BAR
Max Pressure

70 MPa
Max Pressure

1.5 m
Hose Length

Compatibility & Fittings

Test Couplings Included

- G1/8
- G1/4
- G3/8
- M10*1
- M10*1.25
- M12*1.5
- M14*1.5
- UNF7/16-20
- UNF1/2-20
- UNF9/16-18
- NPT1/4-18
- R1/4-19
- JIC37°-7/16UNF

Supported Standards

SAE JIC-37°, ORFS, BSPP, JIS30°

Equipment & Components

Included Components

Component	Quantity
Digital Hydraulic Gauges	2
Test Hoses	2
Quick Connectors (A-F)	6
