

# Excavator Replacement Tooth for E320

This replacement tooth is designed for E320 excavators. It offers excellent wear resistance and smooth surface finish.

## ADDITIONAL IMAGES

## Overview

### High-Performance Excavator Replacement Tooth

The 1U3352RC is a high-performance replacement tooth engineered specifically for compatibility with E320 excavators. Constructed from hardened alloy steel, it is designed to provide optimal penetration and digging efficiency across various soil conditions. This robust component is ideal for heavy-duty applications in construction, mining, and earthmoving, ensuring a long service life and reduced operational downtime.

## Technical Details

### Compatible Equipment

E320 Excavator

### Model Number

1U3352RC

## Material & Durability

### Material

Hardened Alloy Steel

### Manufacturing Process

Forging

### Resistance Features

Wear Resistant, Impact Resistant, Abrasion Resistant

## Application

### Target Industries

- Construction
- Mining
- Earthmoving

### Operational Benefits

- Optimal digging and penetration
- Easy installation
- Secure fitment
- Extended service life
