

Excavator Ripper Attachment

This hydraulic excavator ripper attachment is designed for heavy-duty demolition and trenching. It features robust steel construction for durability and is compatible with various excavator models.

Overview

High-Performance Excavator Ripper

This hydraulic excavator ripper attachment is engineered for demanding tasks including heavy-duty demolition, trenching, and rock breaking. Built with robust steel construction, it offers exceptional durability and an extended service life in harsh environments. The specialized ripper tooth design ensures optimal penetration and fracture of tough materials, while the integrated hydraulic cylinder delivers high breakout force for maximum efficiency.

Technical Specifications

Key Features

- Hydraulic cylinder for high breakout force
- Engineered ripper tooth for material fracture
- Universal mounting system
- Heavy-duty steel construction

Primary Applications

Demolition, Trenching, Rock Breaking, Construction, Mining, Quarrying

Compatibility

Universal mounting system compatible with various excavator models

Material

Robust heavy-duty steel
