

Excavator Ripper Tooth Shank with Guard

This ripper tooth shank is designed for excavators and provides robust ground penetration. It features a replaceable guard that protects against abrasion and impact.

Product Overview

Heavy-Duty Ground Engaging Tools

These professional-grade ripper tooth shanks and protective guards are engineered for high-impact excavation and ground penetration tasks. Constructed from premium high-strength steel alloys, they provide exceptional wear resistance and structural integrity in the most demanding mining and construction environments. Each component is precision-machined to ensure a secure fit, effectively protecting your equipment from abrasion and maximizing operational uptime.

Compatibility

Equipment Types

Excavators, Bulldozers, Motor Graders, Loaders, Electric Shovels
