

Excavator Ripper Tooth

This ripper tooth offers high wear resistance and enhanced production efficiency. Its hard, tough construction provides high reliability and fatigue resistance.

Product Overview

High-Performance Ground Engagement Tools

These ripper teeth are engineered for heavy-duty ground engagement and excavation applications. Designed for maximum durability, they feature a streamlined profile that ensures efficient soil penetration while minimizing drag. Built to withstand high impact and wear, these components are essential for maintaining equipment productivity in demanding environments.
