Product Overview

High-Performance Excavator Rock Chisel Tooth

This heavy-duty rock chisel tooth point is specifically engineered for PC100 series excavators, offering superior durability in demanding excavation and demolition environments. Manufactured from high-quality alloy steel, it provides exceptional wear resistance and structural integrity for rocky and abrasive soil conditions. The optimized geometry ensures efficient material penetration, helping to maximize productivity and minimize downtime on construction and mining sites.

Technical Specifications

Compatible Machine Series

- PC100 Series
- RC Model
- RCK Model

Part Numbers

202-70-12130RC, 502-70-12130

Material Composition

High-strength alloy steel

Certifications

Quality Standards

ISO 9001:2008 • Certified

Application

Suitable Applications

- Construction
- Mining
- Earthmoving
- Demolition
- Rocky soil conditions
- Abrasive environments
