Product Overview

High-Performance Slewing Bearing

This robust slewing bearing is engineered specifically for 80-ton heavy-duty excavators and construction machinery. Designed for exceptional load capacity and precision rotation, it ensures reliable performance in demanding industrial and construction environments. Built from high-grade materials, the component offers long-term durability and operational stability.

Technical Specifications

Vibration Level

V1 • V2 • V3

Gear Options

- Nongearred
- External
- Internal

Construction Material

42CrMo, 42CrMo4, 50Mn, S48C

Seal Specifications

NBR Sealed

Warranty and Service

Warranty Coverage

12 Months

Warranty Months

2000 Hours

Operational Hours

Service Availability

Yes

Application Data

Applicable Industries

- Construction
- Mining
- Manufacturing
- Energy
- Machinery Repair
- Material Handling
