Product Overview

High-Performance Excavator Teeth

These durable excavator teeth are precision-engineered for PC400 series machinery, specifically designed to withstand demanding construction environments. Constructed from high-strength alloy steel, they provide superior wear resistance and impact strength for heavy-duty earthmoving tasks. These components are essential for maintaining optimal digging performance and extending the service life of your equipment in abrasive conditions.

Compatibility & Identification

Part Numbers

- 208-70-14152
- 208-70-14152RC
- 208-70-14152RC-C
- 208-70-14152TL

Compatible Excavators

PC400 RC, PC400 TL

Technical Specifications

Material Composition

High-strength alloy steel • Forged construction

Key Dimensions

164 mm

Primary Dimension

15.8 kg

Secondary Dimension
