Product Overview

High-Performance Excavator Components

This set includes essential ground-engaging tools designed for construction machinery, featuring both general-purpose and rock-penetration teeth alongside a reliable vertical adapter. Engineered for durability and wear resistance, these components ensure optimal performance in demanding excavation environments. The system is designed for secure mounting and enhanced productivity, making it a critical choice for maintaining construction equipment efficiency.

Compatibility & Application

Included Components

- EC210 GP Tooth (General Purpose)
- EC210RC Tooth (Rock Penetration)
- EC210-40/LG6210 Vertical Adapter

Compatible Machine Models

EC210, LG6210

Quality & Performance

Key Attributes

Wear-resistant • Fine workmanship • Stable performance

Reference Identification

Component	Reference ID
General Purpose Tooth	14530544
Vertical Adapter	4210
