Product Overview

Heavy-Duty Excavator Tooth

This high-strength alloy steel tooth is engineered specifically for E349 and E345 excavator models, providing optimal digging and penetration performance. Designed to withstand demanding construction environments, it offers exceptional resistance to wear, abrasion, and impact. The precision-engineered geometry ensures efficient material handling, while the robust construction promotes a long service life and reduced operational downtime.

Technical Specifications

Available Part Variants

- 9W8552
- 9W8552RC
- 9W8552TL

Weight

22.5414 kg

Compatibility

Compatible Machine Models

E349, E345

Quality & Standards

Certifications

ISO 9001:2008
