

# Excavator Track Roller for Undercarriage Support

Excavator track rollers provide essential support for high static loads in excavator undercarriage systems. These rollers are engineered with heat-treated, MIG-welded steel and bimetallic bushings for durability and reduced maintenance.

## ADDITIONAL IMAGES

## Product Overview

### Heavy-Duty Undercarriage Support

This excavator track roller is engineered for superior structural support and durability in demanding construction environments. Featuring MIG-welded steel construction and precision heat treatment, it offers exceptional wear resistance and deformation protection. The maintenance-free design includes lifetime lubrication and bimetallic bushings to reduce operating costs and ensure reliability under both high static loads and high-speed conditions.

## Technical Specifications

### Maintenance

Lifetime Lubrication • Bimetallic Bushings

### Construction Method

MIG Welded, Forged, Cast

## Compatibility

### Compatible Brands

- Bobcat
- Caterpillar
- Daewoo/Doosan
- Hitachi
- JCB
- Kobelco
- Komatsu
- Kubota
- Morooka
- Takeuchi
- Volvo/Pel-Job
