

Excavator Undercarriage Bolts and Nuts

These bolts and nuts are designed for use in excavator undercarriage systems. They offer high strength and durability for reliable performance.

Product Overview

High-Performance Undercarriage Components

These excavator undercarriage bolts and nuts are engineered for durability and reliability in demanding construction environments. Manufactured from premium raw materials like 40Cr and 35CrMo, they ensure a long service life and high accuracy for heavy-duty machinery. With a focus on quality assurance, these components are designed to meet rigorous standards, offering a dependable solution for maintenance and repair needs.

Technical Specifications

Bolt Grade

Grade 10.9 • Grade 12.9

Diameter Range

1/2 mm to 36 mm

Bushing Hardness

62 HRC

Bushing Internal Diameter

±0.03mm to ±0.10mm

Material & Quality

Raw Materials

40Cr, 35CrMo, Carbon Steel, Stainless Steel, Low-carbon alloy steel

Certifications

ISO9001:2015, ISO14001:2015

Compatibility

Compatible Brands

- Caterpillar
- Komatsu
- Hitachi
- Daewoo
- Hyundai
- Kobelco
- Samsung
- Sumitomo
- Volvo
- Mitsubishi

Service & Logistics

Service Features

- OEM and customized design available
- 100% quality inspection
- Timely delivery
- Competitive pricing
- Long warranty
