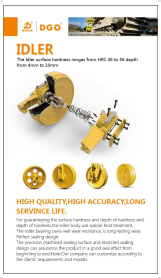
Excavator Undercarriage Idler

This excavator idler features a surface hardness of HRC 48 to 56, enhanced by special heat treatment. Its precision-machined sealing surface and encircled sealing ensure a reliable seal effect.



Product Overview

High-Performance Excavator Idler

This excavator undercarriage idler is engineered for maximum durability and reliability in demanding work environments. Featuring specialized heat treatment and precision-machined sealing surfaces, it offers exceptional wear resistance and a long service life. Designed to meet rigorous international standards, this component supports OEM customization to ensure a perfect fit for your specific machinery requirements.

Technical Specifications

Surface Hardness	52 HRC
Hardness Depth	4mm - 10mm
Sealing Design	Precision machined with encircled sealing for reliable protection

Quality & Standards

Quality Control

- 100% quality inspection
- Special heat treatment process
- Premium material quality

Certifications	ISO 9001:2015, ISO 14001:2015

Service & Support

Service Highlights

OEM Available • Timely Delivery • Long Warranty • Prompt Feedback

Customization Options	Yes
