

Excavator Windshield Wiper Motor Assembly

This excavator windshield wiper motor assembly features a robust electric motor and linkage system. It is designed for efficient and reliable windshield cleaning in heavy-duty construction machinery applications.

Product Overview

Reliable Excavator Wiper Solution

This excavator windshield wiper motor assembly is engineered for stable performance and an extended service life in demanding construction environments. Designed as a robust integrated system, it includes the electric motor, linkage, and wiper arms for a complete cleaning solution. Proven across numerous factory applications, it is built to withstand the rigors of heavy machinery use.

Technical Specifications

Reliability Status

Industrial Grade • Proven Performance

Assembly Components

Electric Motor, Linkage System, Wiper Arms

Electrical Interface

Multi-wire connector
