

Excavators and Wheel Loaders

Excavators are equipped with hydraulic arms and digging buckets for earthmoving. Wheel loaders feature large front-end buckets suited for material handling.

Product Overview

Heavy-Duty Earthmoving Solutions

This collection features versatile construction machinery designed for demanding excavation and material handling tasks. The equipment includes robust excavators with powerful hydraulic systems and high-capacity wheel loaders optimized for site productivity. These machines are engineered to deliver consistent performance across various earthmoving and loading applications.

Technical Capabilities

Primary Functions

- Excavation
- Material Loading
- Earthmoving

Equipment Types

Excavators, Wheel Loaders

Performance Metrics

Bucket Capacity

3 m³

Standard Capacity
