

Expandable Garden Hose with Brass Fittings

This expandable garden hose features a durable fabric outer layer and flexible inner tube. With brass fittings for secure connections and a kink-resistant design, this lightweight hose expands when water pressure is applied and contracts when drained.

Product Overview

High-Performance Expandable Garden Hose

This telescopic garden hose is engineered for durability and convenience, featuring a robust alloy construction with high-quality brass fittings. Designed to expand up to three times its original length when pressurized, it provides a powerful 15-meter spray distance. The hose is built to withstand harsh outdoor conditions, offering excellent wear, sun, and explosion resistance for long-term reliability.

Technical Specifications

Material	Alloy with copper-plated components
Expansion Capability	3x Telescopic
Max Water Pressure	8 kg
Spray Distance	15 M

Features

Included Components

- Metal gun head
- Copper-plated telescopic hose
- Brass fittings

Durability Features	Wear-resistant, Sun-proof, Explosion-proof, Aging-resistant
