Product Overview

Efficient Winter Visibility Solution

This 12V extendable heated de-icer is engineered to simplify winter car maintenance by rapidly melting ice and frost from windshields. Featuring an integrated heating element and a built-in LED light, it ensures clear visibility even during dark, early morning commutes. The extendable design allows users to reach across the entire windshield with ease, making it an essential tool for vehicle safety.

Technical Specifications

Power Source	12V DC
Power Consumption	18 W
