Product Overview

Professional Telescopic Fruit Harvester

This versatile fruit harvester is designed for safe and efficient fruit picking, eliminating the need for ladders and reducing the risk of falls. Featuring a durable, lightweight fiberglass telescopic pole, it extends from 155cm to 370cm to reach high branches with ease. The system includes three interchangeable heads, providing the flexibility to harvest various fruit types and perform light pruning tasks, ensuring minimal fruit bruising during collection.

Technical Specifications

Minimum Length	155 cm
Maximum Length	370 cm
Pole Sections	3
