

External Serial Communication Controller

This external controller is designed for outside hanging mode operation. It utilizes a DB9 serial port for communication in industrial tax control applications.

Overview

Industrial Serial Communication Controller

This external control unit is designed for reliable industrial data communication and tax control applications. Featuring a durable, ventilated enclosure, it ensures stable performance in demanding environments. The unit utilizes a standard DB9 serial interface for seamless integration into existing industrial systems.

Technical Specifications

Primary Applications

- Industrial Control Systems
- Tax Control Data Processing
- Serial Data Communication

Communication Interface	DB9 Serial Port
Device Type	External Control Unit
Design Features	External Mounting, Ventilated Enclosure, Durable Housing
