

External Tooth Lock Washers

External tooth lock washers, also known as star washers, are designed for secure fastening. These washers prevent loosening caused by vibration or torque.

Product Overview

External Tooth Lock Washers

These external tooth lock washers, also known as star washers, are engineered to provide secure fastening by biting into both the screw head and the substrate material. They are specifically designed to prevent loosening caused by vibration or torque in various assembly applications. The collection includes both silver and bronze/brass finish options.

Product Details

Available Finishes

- Silver
- Bronze
- Brass

Washer Types	External Tooth, Lock Washer, Star Washer
Profile Type	Outer profile muon

Functionality

Key Benefits

- Secure fastening
- Vibration resistance
- Torque retention
