

External Vacuum Packaging Machine with LED Indicator

This machine is applicable to vacuum pack metal hardware and various electronic products, protecting them from moisture, oxidation, and discoloration. It is also suitable for vacuum packing cloth, cotton, and wool products to reduce packaging volume and logistics costs.

ADDITIONAL IMAGES

Overview

Professional Vacuum Packaging Solution

This external vacuum packaging machine is a versatile industrial tool designed to protect a wide range of items from moisture, oxidation, and discoloration. It features an integrated LED indicator for precise process monitoring, ensuring consistent sealing performance. Whether you are packaging electronics, textiles, or food products, this machine helps reduce logistics volume and extends the shelf-life of perishable goods.

Applications

Suitable Applications

Metal Hardware, Electronic Products, Textiles, Seafood, Fruits, Tea, Salted/Soybean Products

Key Features

Operational Capabilities

- Moisture and oxidation protection
- Volume reduction for logistics
- Extended shelf-life for food items
- Gas flushing capability (Nitrogen/CO2)
- LED process monitoring indicator

Design Configuration

External Vacuum • Top and Bottom Heating
