

Extra Heavy Duty Galvanized Wire Rope Thimble

This extra heavy-duty wire rope thimble is made from high-quality steel and galvanized for corrosion resistance. It is designed to protect wire ropes and cables from wear and deformation.

Product Overview

Extra Heavy Duty Protection

This extra heavy-duty galvanized wire rope thimble is engineered to provide superior protection against wear, crushing, and deformation for wire ropes and cables. Constructed from high-quality steel and finished with hot-dip galvanization, it offers exceptional corrosion resistance for demanding marine and industrial environments. It serves as a vital component for creating secure, durable eye terminations in lifting and rigging applications.

Technical Specifications

Finish	Hot-dip galvanized, High-quality steel
Standard	U.S. Type

Key Features

Performance Benefits

- Prevents wire rope crushing and abrasion
- Enhanced durability in marine environments
- Supports heavy-duty lifting and rigging
- Extended service life for terminations
