

Extruded Profile Coiler

This high-precision coiler is designed for continuous and efficient coiling of extruded profiles, pipes, and tubes. It features adjustable coiling speed, automatic tension control, and a user-friendly control panel for precise operation.

Overview

High-Precision Extruded Profile Coiler

This high-precision coiler is engineered for the continuous and efficient winding of extruded profiles, pipes, and tubes. Built for demanding industrial environments, it features robust construction and advanced controls to ensure reliable, long-term operation. The system is compatible with a wide range of materials, including PVC, PE, and PP, making it a versatile solution for extrusion production lines.

Technical Specifications

Key Features

- Adjustable coiling speed
- Automatic tension control
- User-friendly control panel
- Customizable coiling diameter
- Adjustable coil width

Compatible Materials

PVC, PE, PP
