

Eye Coupling Nut

Eye coupling nuts provide a secure and reliable fastening solution. They feature an eyelet for easy attachment in rigging, suspension, and tensioning systems.

Product Overview

Professional Electrical Termination

The Eye Coupling Nut is a high-performance electrical cable lug engineered for secure and reliable cable termination. Constructed from high-conductivity materials, it ensures optimal current flow while minimizing voltage drop for critical connections. Its design features a robust barrel suitable for both crimping and soldering, paired with a precision-drilled eyelet for seamless attachment to terminal blocks or equipment studs.

Technical Specifications

Suitable Applications

Industrial • Commercial

Termination Methods

Crimping, Soldering

Design Features

Construction Features

- Robust barrel for secure attachment
- Flattened eyelet design
- Precisely drilled mounting hole
- High-conductivity material composition
