Product Overview

Professional Safety Goggles

These safety goggles feature an advanced indirect ventilation design with four vent valves, ensuring optimal airflow while providing protection against splashes and debris. The extended forehead frame is engineered for a superior face fit, and the design comfortably accommodates most corrective eyewear or half-face masks. These goggles are built to meet rigorous industrial safety standards, making them a reliable choice for professional environments.

Technical Specifications

Wearability

- Fits over corrective glasses
- Compatible with half masks

Certifications

CE, EN 166

Ventilation

Indirect ventilation with four valves
