Overview

High-Performance Bi-Metal Liner

This bi-metal liner is precision-engineered for F-500 triplex mud pumps, providing exceptional wear resistance and durability in demanding drilling environments. Constructed with a wear-resistant inner sleeve metallurgically bonded to a high-strength outer shell, it effectively resists abrasion, corrosion, and high-pressure conditions. Designed for optimal fit and performance, this component serves as a reliable, cost-effective solution to maintain pump efficiency and minimize operational downtime.

Certifications & Standards

Certifications	API 7K, ISO 9001:2008
----------------	-----------------------

Compatibility & Usage

Compatibility	F-500 Triplex Mud Pumps
OEM Interchangeability	Yes

Technical Features

Construction

Bi-Metal • Bonded Sleeve

Key Benefits

- High wear resistance
- Corrosion resistance
- High-pressure tolerance
- Extended service life
