

F Clamp for Woodworking and Metalworking

F clamps are versatile tools for securely holding workpieces during woodworking and metalworking tasks. The clamp features a fixed jaw on one end and a sliding jaw that adjusts along a threaded bar to apply pressure.

Product Overview

Professional Grade F Clamps

These versatile F clamps are engineered for reliable workpiece holding in woodworking, metalworking, and general assembly tasks. Featuring a durable fixed jaw and an adjustable sliding jaw on a threaded bar, they provide consistent clamping force and stability. Designed for precision and endurance, these tools are essential for any professional workshop or construction site requiring secure fixture solutions.

Technical Specifications

Standards	DIN 5117
