

Fabric Cutting Machine with Gridded Work Table

This cutting machine is designed for precision cutting applications. It features a robust frame, a spacious work table with a gridded surface, and a vertically mounted cutting head.

Overview

Professional Fabric Cutting Solution

This industrial fabric cutting machine utilizes advanced air-cushion technology to ensure smooth movement and relaxed material handling during the cutting process. Designed for high performance, it delivers precision equivalent to top-tier international standards for a wide range of materials including cotton, knitting, synthetic fibers, sponge, and leather. The system features a robust, gridded work table and a stable, high-powered cutting mechanism for reliable performance in professional workshops.

Technical Capabilities

Performance Metrics

180 mm

Cutting Thickness

550 W

Motor Power

Model Specifications

Model	Cut Length	Voltage
CZD-500	500	380V
CZD-700	700	380V
CZD-900	900	380V
CZD-1200	1200	380V

Compatible Materials

Cotton, Knitting, Synthetic Fibers, Sponge, Leather, Weaving Materials

Design Features

Key Design Elements

- Air cushion support system
- Gridded work table for precision alignment
- Cabinet base for storage and mobility
- Integrated operator safety mechanisms
- Vertical mounting cutting head
