

Fabric Garment Steamer with Telescopic Pole

This fabric steamer quickly preheats in 30 seconds. It utilizes a removable water tank and telescopic pole to soften, refresh, and remove wrinkles from various fabrics.

Product Overview

Professional Garment Care Solution

This high-performance garment steamer is designed to efficiently soften, refresh, and remove wrinkles from a wide variety of fabrics. With a rapid 30-second preheating time and a generous 2100ml water tank, it offers extended operation for clothing, bedding, curtains, and upholstered furniture. The inclusion of a telescopic pole and pedal switch ensures ease of use and ergonomic operation for professional environments.

Technical Specifications

Model	378
Power Consumption	1630 W
Voltage Compatibility	220-240V, 100-120V
Operating Frequency	50/60Hz

Performance Metrics

Water Tank Capacity	2100 ml
Preheating Time	30 seconds
Continuous Working Time	45-70 minutes

Features

Key Features

- Removable water tank for easy refilling
- Adjustable telescopic pole
- Convenient pedal switch operation
- Adjustable steam temperature

Suitable For	Clothing, Bedding, Curtains, Upholstered Furniture
