

Fabric Garment Steamer with Telescopic Pole

This fabric steamer quickly refreshes garments and other textiles. It features a removable water tank and a detachable telescopic pole.

Product Overview

Professional Fabric Care

This high-performance garment steamer is designed to efficiently soften, refresh, and remove wrinkles from a wide variety of fabrics. With a rapid 30-second preheating time and a generous 1400ml water capacity, it offers 45 minutes of continuous steaming power. Its versatile design makes it suitable for clothing, bedding, curtains, and upholstered furniture, ensuring a polished look for all your textiles.

Technical Specifications

Power Output	1500 W
