

# Fall Protection Safety Lanyard with Double Locking Snap Hooks

This safety lanyard is designed for fall protection and features a durable rope construction with double locking snap hooks for secure attachment. The lanyard includes energy absorbing sleeves to reduce impact force in the event of a fall.

## Product Overview

### Professional Fall Protection

This high-performance fall protection safety lanyard is engineered for secure attachment in demanding industrial and construction environments. Featuring a durable rope construction paired with double-locking snap hooks, it provides reliable fall arrest capabilities. The integrated energy-absorbing sleeve effectively minimizes impact forces during a fall, ensuring superior user safety.

## Technical Details

Model Number	902D
Attachment Mechanism	Double Locking, Snap Hooks

## Safety Features

### Recommended Use

- Industrial Maintenance
- Construction Sites
- Fall Arrest Systems

Impact Management	Yes
Material Structure	Durable Rope Construction
