

Fan Blade Replacement Assembly

This replacement blade assembly is designed for electrical and exhaust fans. It is constructed from durable materials with an aerodynamically designed multi-blade configuration to maximize air displacement and minimize noise.

Product Overview

High-Performance Fan Blade Assembly

This replacement fan blade assembly is engineered for electrical and exhaust fans, designed to restore optimal airflow and appliance efficiency. Featuring a robust multi-blade configuration, the unit is built from durable materials to ensure long-lasting performance in demanding environments. The aerodynamic design maximizes air displacement while effectively minimizing operational noise, making it an ideal solution for replacing worn or damaged components.

Technical Details

Blade Configuration	Multi-blade design
Design Features	Aerodynamic, Noise Reduction, High Airflow

Compatibility & Installation

Compatible Equipment

- Electrical Fans
- Exhaust Fans

Installation Benefits

Secure Attachment • Stable Operation • Easy Replacement

Mounting Mechanism	Central hub motor shaft attachment
