

# Farm Tractor for Agricultural Use

This farm tractor is designed for agricultural purposes. It features large tires for traction and is equipped with a driver's seat and various mechanical components.

## Overview

### Heavy-Duty Agricultural Tractor

This robust farm tractor is engineered for demanding agricultural environments, providing the necessary traction and power for field operations. Featuring a durable design with large, high-grip tires and a visible mechanical architecture, it is built to handle heavy-duty tasks efficiently. The unit is designed for reliability and performance in diverse farming conditions.

## Technical Specifications

Model Identifier	504
Primary Application	Agricultural, Heavy-Duty, Field Work

## Design Features

### Design Features

- High-traction tires for uneven terrain
- Open operator station with ergonomic seating
- Accessible engine and exhaust components
- Durable red exterior finish
