

Fastener Washers Assortment

This assortment contains multiple types of washers. Washers are used to distribute the load of a fastener and prevent damage to the surface.

Product Overview

Versatile Fastener Solution

This comprehensive assortment of washers is designed to meet diverse fastening requirements in industrial and mechanical applications. The set includes a variety of essential types, such as flat washers, square washers, and split lock washers, ensuring you have the right component for load distribution and surface protection. These high-quality washers are engineered to prevent damage to fastened surfaces while providing necessary spacing, insulation, or locking security for threaded fasteners like bolts and screws.
