

Faucet Mount Water Filter

This countertop water filter is designed for direct connection to a faucet. It features a cylindrical filter housing with a ribbed exterior and a chrome spout.

Product Overview

Clean Water Filtration Solution

The CJ-1 A1 Faucet Mount Water Filter is a highly efficient solution designed to provide cleaner, safer drinking water directly from your tap. This model utilizes a ceramic filtration system to effectively reduce turbidity, ensuring high water quality for home or commercial use. Easy to install and operate, it connects seamlessly to standard faucets to deliver consistent performance.

Technical Specifications

Model	CJ-1 A1
Filter Material	Ceramic

Performance Metrics

Key Performance Metrics

0.1 Mpa Min Water Pressure	0.5 Mpa Max Water Pressure	1 NTU Output Turbidity
--------------------------------------	--------------------------------------	----------------------------------

Operational Conditions

Operating Temperature	5-38°C
-----------------------	--------

Dimensions and Logistics

Container Loading Capacity

Container Type	Capacity (PCS)
20'GP	3660
40'HQ	9690

Unit Dimensions	150 x 130 x 330 mm
