

FC280SA Series DC Motor

The FC280SA series is a DC motor. It is designed for efficient power conversion in various applications.

Product Overview

FC280SA Series DC Motor

The FC280SA Series is a compact, high-performance DC motor designed for precise motion control applications. Engineered for reliability and efficiency, this series is well-suited for automotive actuators, electronic locks, and small household appliances. Its robust construction ensures consistent operation across a wide range of voltage requirements.

Technical Specifications

Series	FC280SA
Motor Type	DC Motor

Performance Metrics

Performance Highlights

280 class

Series Size

Applications

Typical Applications	Automotive Actuators, Electronic Locks, Small Appliances, Precision Instruments
----------------------	---

Compliance

Certifications

RoHS Compliant • CE Certified
