

Feeler Gauge Set

This feeler gauge is used for measuring narrow gaps or clearances between parts. It includes multiple leaves of varying thicknesses, allowing for easy selection and measurement.

Product Overview

Precision Gap Measurement

This precision thickness gauge set is designed for engineers and technicians requiring accurate measurements of narrow gaps and clearances in mechanical assemblies. Featuring multiple leaves of varying thicknesses, the tool allows for rapid assessment of tolerances during maintenance or assembly. The durable pivot mechanism ensures reliable leaf selection and long-term utility in professional workshop environments.

Technical Specifications

Included Thicknesses (Inches/mm)

- 0.0015 inch
- 0.038 mm
- 0.06 mm

Key Features

Pivot Mechanism • Clear Markings • Multi-leaf design

Material Composition

Silver-colored, Brass-colored
