

Felt Buffing Wheel for Polishing

This high-density felt buffing wheel is designed for polishing and finishing various materials. It is available in various diameters and thicknesses and features a central mounting hub for secure attachment to power tools.

Product Overview

High-Performance Polishing Solution

This high-density felt buffing wheel is engineered for professional polishing and finishing tasks across a variety of materials. Its durable construction ensures longevity, while the central mounting hub allows for secure and stable attachment to standard power tools. Designed to deliver a smooth, scratch-free surface, it is an ideal choice for working with metals, plastics, and composites.

Technical Specifications

Applications

- Polishing
- Finishing
- Surface smoothing

Material Type	High-density felt
Compatible Materials	Metals, Plastics, Composites
Mounting Type	Central mounting hub
