

# Felt Polishing Wheel for Metal Finishing

This felt buffing wheel is designed for polishing and finishing applications. It features a layered felt construction for flexibility and uniform material removal.

## Product Overview

### Professional Polishing Solution

This felt polishing wheel is engineered for high-performance finishing on a variety of surfaces, including metal, plastic, and composites. Its layered felt construction provides the flexibility needed for uniform material removal and consistent contact. Designed with a central metal hub for secure mounting, it is an ideal tool for achieving a high-gloss finish on industrial or workshop projects.

## Technical Details

### Construction Features

- Layered felt design
- Central metal hub
- Radial flap arrangement
- Flexible polishing surface

### Compatible Materials

Metal, Plastic, Composite

## Application

### Finish Capability

High-gloss • Uniform finishing
