

Female Drop-In Concrete Anchor

This female concrete anchor is designed for flush mount applications. It is made from high-quality steel and features an internal thread for easy installation with a setting tool.

Product Overview

Professional Grade Female Drop-In Anchor

The Female Drop-In Concrete Anchor is a high-performance fastening solution engineered for flush mount applications in solid concrete, block, and brick substrates. Constructed from durable, high-quality steel with a corrosion-resistant finish, this anchor ensures long-term reliability in demanding environments. It features an internal thread design that allows for simple installation using a standard setting tool, making it an efficient choice for suspending electrical conduit, HVAC ductwork, and fire sprinkler systems.

Technical Details

Mounting Style

Flush Mount

Anchor Type

Female Drop-In Concrete Anchor

Installation

Internal thread with setting tool

Finish

Corrosion-resistant

Applications

Typical Applications

- Electrical conduit suspension
- HVAC ductwork installation
- Fire sprinkler systems
- General concrete, block, and brick fastening
