Product Overview

Respiratory Protection

This FFP2 particulate filtering half mask is engineered for high-efficiency respiratory protection against airborne particles, dust, and saliva droplets. Featuring a sophisticated five-layer design, it balances advanced filtration capabilities with long-wear comfort. The mask is ideal for professional environments requiring reliable hygiene standards and effective particle blocking.

Construction & Materials

Layer Composition

Layer	Function	Material
1	Molding	Non-woven fabrics
2	Filter	Melt-blown
3	Filter	Melt-blown
4	Buffer	Hot air fabrics
5	Skin-friendly	Non-woven fabric

Key Features

Performance Highlights

5 layers
