

Fiber Laser Metal Cutting Machine

This fiber laser metal cutting machine is designed for industrial applications, providing high precision and efficiency. It is capable of cutting various materials, featuring a robust frame and an advanced control system.

Overview

Industrial Fiber Laser Cutting Solution

This high-precision fiber laser cutting machine integrates advanced optical, mechanical, and electrical technologies into a single robust system. Designed for industrial-grade applications, it utilizes high-performance CNC control to deliver high-speed and efficient processing for a wide range of sheet metals. The machine is an ideal solution for demanding sectors such as metal fabrication, automotive manufacturing, and aerospace engineering.

Technical Specifications

Model Series	3015
Key Features	High-Speed Cutting, CNC Control, Industrial Grade, Safety Enclosure

Performance

Supported Materials

- Steel
- Stainless Steel
- Aluminum
- Various Sheet Metals

Performance Highlights

3015 series
