

Fiber Optic Cabinet Meter

This meter is designed for installation in fiber optic cabinets. It provides essential measurements for monitoring and controlling fiber optic system performance.

Product Overview

Industrial Fiber Optic Cabinet Meter

This industrial-grade meter is designed for precise measurement and control within fiber optic cabinet systems. Featuring a robust, multi-tiered cylindrical architecture, the unit is engineered to integrate seamlessly into complex industrial infrastructures. Its design includes an auxiliary control unit, ensuring reliable performance for demanding monitoring applications.

Technical Specifications

Integrated Components

- Primary measurement unit
- Secondary control motor

Device Type	Fiber Optic Cabinet Meter
Construction	Multi-tiered cylindrical structure

Application

Primary Application	Fiber Optic Infrastructure, Industrial Measurement, Control Systems
