Product Overview

Professional Multimedia Distribution

This high-quality fiber optic distribution box is engineered for reliable signal management in both residential and commercial communication projects. Constructed from flame-retardant materials, it features an optimized internal layout designed to house fiber optic components alongside essential networking hardware like ONUs, routers, and faceplates. The unit combines durability with a modern, compact design to ensure efficient heat dissipation and secure cable organization.

Technical Specifications

Material	Flame retardant material
Heat Dissipation	Yes

Capacity & Layout

Internal Capacity

- 1 ONU
- 1 Router
- 2 Faceplates (2-core)
- 4 Modules

Logistics

Quantity per Carton	20 pcs
