Overview

FTTH Network Solution

The TX-FTTH-618 Optical Termination Box is a robust solution designed to connect feeder or distribution cables to subscriber drop cables in FTTH networks. Featuring a high-impact, UV-resistant, and rainfall-resistant plastic construction, it is engineered for both indoor and outdoor reliability. The dual-tray system allows for efficient splicing of feeder cables with PLC splitters on the rear tray, while the front tray manages subscriber connections, supporting up to 16 FTTH drops.

Technical Specifications

FTTH Drop Capacity

16 lines

Max Drops

Input Ports	2 ports
Output Ports	16 ports
Supported PLC Splitters	1x8 PLC, 1x16 PLC

Installation & Design

Mounting Options

Wall Mount • Pole Mount

Environmental Resistance

- Ultra violet (UV) resistant
- Rainfall resistant
- High impact plastic construction
