

Fiberglass Handle Claw Hammer

This claw hammer is equipped with a high-tension fiberglass handle for enhanced durability and shock absorption. Its hardened steel head ensures strength and longevity, making it suitable for various applications.

Product Overview

Professional Grade Claw Hammer

This high-performance claw hammer is engineered for durability and user comfort in demanding environments. Featuring a hardened steel head and a high-tension fiberglass handle, it is designed to withstand heavy-duty use while effectively absorbing shock. Its ergonomic, non-slip soft grip ensures precision and control, making it an ideal tool for carpentry, construction, and general repair tasks.

Technical Specifications

Head Weight	16 oz
Head Material	Hardened Steel
Handle Material	High-tension fiberglass

Features & Benefits

Key Features

- Ergonomic design
- Vibration-absorbing handle
- Non-slip soft grip
- High-tension durability

Common Applications	Carpentry, Construction, General Repairs
