

Fiberglass Handle Pickaxe with Composite Cover

This pickaxe features a durable head attached to a composite plastic-covered handle reinforced with 70% fiberglass. Designed for breaking up hard soil and rocks, it provides a comfortable grip and enhanced strength.

Product Overview

Heavy-Duty Performance

This professional-grade pickaxe is engineered for demanding excavation and landscaping tasks. Featuring a robust head paired with a composite plastic-covered handle reinforced with 70% fiberglass, it delivers both exceptional durability and impact resistance. The ergonomic design ensures a comfortable grip, allowing for efficient performance when breaking through hard soil, rocks, and compacted terrain.
