

Fiberglass Handle Pickaxe

This pickaxe features a durable plastic-coated fiberglass handle for enhanced grip and reduced vibration. The head is made of hardened steel, providing excellent strength and longevity for demanding tasks.

Product Overview

Professional Grade Pickaxe

This pickaxe is engineered for demanding tasks, featuring a hardened steel head designed to break up hard soil, rocks, and tough materials with ease. The handle is constructed from durable, plastic-coated fiberglass, which provides an enhanced grip while significantly reducing vibration during impact. Its ergonomic design is specifically crafted to minimize user fatigue, ensuring comfort and efficiency during extended periods of heavy-duty work.

Construction & Materials
