Overview

Heavy-Duty Coupling Solution

This heavy-duty fifth wheel coupling device is engineered for semi-trailer trucks, providing a secure and stable connection between the tractor and trailer. Constructed from durable cast steel, it features a robust locking mechanism designed for long-lasting performance and reliable operation under heavy loads. The unit is finished with a protective coating to resist corrosion and wear, ensuring durability in demanding trucking applications.

Technical Specifications

Key Features

- Robust locking mechanism
- Corrosion-resistant finish
- Central aperture design
- Standardized mounting points
