

Fillet Knife with Plastic Handle

This fillet knife is designed for filleting fish. It features a stainless steel blade and a slim plastic handle.

Product Overview

Professional Fillet Knife

This fillet knife features a high-quality stainless steel blade designed for precision and durability during fish preparation. The ergonomic plastic handle ensures a secure grip, making it an essential tool for both commercial kitchens and household use. With customization options available for handle colors, this knife can be tailored to meet specific aesthetic or operational requirements.
